

May 2010  
Staff Change

Fire team leader, Stuart Anderson has recently resigned from Scion to take up a position with MAF in their Forestry Policy group, based in Rotorua. Stuart made a significant contribution to the research and to fire management over the past 9 years, and we thank him for his input.

Due to the postponement of FRST re-bidding, there will be a delay with replacing Stuart while research funding and capability requirements are confirmed. In the interim, work will continue via other Scion staff and external contractors to ensure completion of contracted tasks.
