

THE INTRODUCTION OF THE RW30 WINDSOR TREE HARVESTER INTO EARLY PINE THINNINGS

O. H. RAYMOND

A.P.M. Forests Pty Ltd, Morwell, Victoria

ABSTRACT

The development of the Windsor Tree Harvester is outlined. Production and availability statistics are given. Mechanical problems and where possible, solutions to these problems, are discussed. Non-mechanical problems associated with the introduction of any mechanised harvesting system are raised. A series of theoretical costings is given.
